| Nominal heat output [kW]     | 10                                                                       |
| Continuous burning appliance | —                                                                        |
| Type test standard           | DIN EN 13240                                                             |
| Year of testing              | 2008                                                                     |
| Test laboratory              | Prüfanstalt der Maschinenbauindustrie, s.U., Brno, Tschechische Republik |
| Number of test laboratory    | 18                                                                       |
| Number of test report        | 30-6061-1/08                                                             |

### Flue gas values

|                             | Wood |
|-----------------------------|------|
| Flue gas mass flow [g/s]    | 12   |
| Flue gas mass flow [g/s]    | 204  |
| Necessary flue draught [Pa] | 11   |

### Further important characteristics of the appliance

Suitability for installation to a shared flue<sup>1)</sup>

Connectivity to the central heating system

General technical approval for room sealed operation

Type of appliance acc. EN 16510-1

<sup>1)</sup> For unsealed operation it is possible to install the appliances to a shared flue system (please see installation manual).

On behalf of the manufacturer, the HKI Industrieverband e.V. hereby confirms compliance with the respective requirements\* in accordance with 1.BImSchV. The type test report of the fireplace has been submitted to the HKI Industrieverband e.V.

\* A green check mark with a „1“ indicates that the requirements of the 1st BImSchV are fulfilled, a green check mark with a „2“ indicates that the 2nd level of the 1st BImSchV is fulfilled. A yellow check mark shows that the transitional regulation of the 1st BImSchV is fulfilled and a red line means that the 1st BImSchV is not fulfilled.

## Evaluation of emission data and efficiency Wood

| Norm DIN EN 13240 (Intermittent burning): Roomheater with flat-layer firing | Evaluation                                                                                     |
|-----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| D - 1.BImSchV                                                               | <br>Stufe 2 |
| A - Austrian regulation referred to Art 15a B-VG                            |             |
| CH - Swiss clean air act                                                    |             |
| DK - Danish regulation for air pollution from wood burners                  |             |
| F - Crédit d'impôt à la transition énergétique                              | <br>7★      |

## Evaluation of emission data and efficiency Lignite briquettes

| Norm DIN EN 13240 (Intermittent burning): Roomheater with flat-layer firing | Evaluation                                                                                     |
|-----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| D - 1.BImSchV                                                               | <br>Stufe 2 |
| A - Austrian regulation referred to Art 15a B-VG                            |             |
| CH - Swiss clean air act                                                    |             |

## Emission evaluation legend

---

-   Compliant with the requirements of the 2nd stage of the 1.BImSchV (only for Germany)
-   Compliant with the requirements of the 1st stage of the 1.BImSchV (only for Germany)
-   Compliant with the requirements of the Austrian Agreement pursuant to Art. 15a B-VG from 2015 (applies only to Austria)
-   Compliant with the requirements for the „Crédit d'impôt“ promotion in France, the fireplace complies with the classification 7\* of the Flamme Verte Label
-   Compliant with the requirements for the „Crédit d'impôt“ promotion in France, the fireplace complies with the classification 6\* of the Flamme Verte Label
-   Compliant with the requirements for the „Crédit d'impôt“ promotion in France, the fireplace complies with the classification 5\* of the Flamme Verte Label
-   Compliant with the requirements of the 1 star stage in Italy.
-   Compliant with the requirements of the 2 star stage in Italy.
-   Compliant with the requirements of the 3 star stage in Italy.
-   Compliant with the requirements of the 4 star stage in Italy.
-   Compliant with the requirements of the 5 star stage in Italy.
-  Fulfils the requirements
-  Complies with requirements of the transition ruling (1.BImSchV)
-  Requirements are not fulfilled
-  No information/unknown
-  No measuring values are available for this fuel, operation with this fuel is not permitted

No symbol means that there are no requirements.
